

BILSTEIN

Driving a vehicle equipped with Bilstein Gas Pressure Shock Absorbers is an exhilarating experience. Bilstein Shock Absorbers deliver unbelievable control, stability, precise handling, ultimate performance with incredible comfort. Bilstein was the first to apply the patented gas pressure principle to controlling ride characteristics on automobiles and introduced the world's first shock absorber. Today, Bilstein continues to be one of the leaders in mono tube gas pressure shock absorber technology. The Bilstein name graces not only monotube gas pressure shock absorbers, but also single and twin tube Macpherson strut style suspensions. Bilstein offer a precise matched shock absorber to suit your vehicle from high performance on road to the most severe conditions off road.
